

HOW TO: Paint Stick American Flag (In 8 Easy Steps!)

Supplies:

- 9 Paint sticks
- Red, white, and blue acrylic paint
- Mod podge
- Twine
- Scissors
- Glue gun

BEFORE:

AFTER:

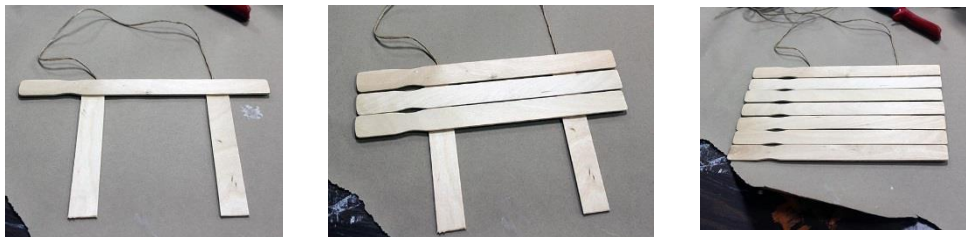

Step 1: After gathering all of your materials, lay seven paint sticks down in a row. Trim the remaining two paint sticks to the length of the paint sticks that will be the flag. These are your supporting paint sticks.

Step 2: Trim a piece of twine that will be used to hang. Glue the twine between the top paint stick and the back supporting paint sticks. Allow glue to dry.

Step 3: Putting the back support forward, glue on each paint stick individually using the glue gun.

Step 4: Using a straight edge, draw a line for what will be blue.

Step 5: Paint your flag! We used two coats of acrylic paint to get the look we desired.

Step 6: Free-hand a few stars in the blue, or use wooden stars from a craft store.

Step 7: Paint a coat of Mod Podge on to seal the paint, and let dry.

Step 8: Hang your paint stick American flag for everyone to enjoy!
